TECHNOLOGIES

Frontend: React(1,5 years), Next.js, Ruby on Rails
Backend: NestJS, Ruby on Rails
Database: PostgreSQL, MySQL, MongoDB
Other: TypeScript, Velo, Amazon EC2

LANGUAGES

Spanish (Native)
English (Advanced)

EDUCATION

Universidad Adventista del Plata

Systems Engineering (2018 - 2022)

• Assistant Professor of Databases (2020)

EXPERIENCE

Frontend/Backend Developer - Velo Developer

Lightning Team, Jan 2023 - Present

• Integrated payment gateways into Wix e-commerces using Velo (JavaScript) and REST APIs.
• Deployed JavaScript apps on Amazon EC2 with automatic start using PM2 and configured secure firewalls.
• Developed an RTSP stream decoder server in NodeJS with a Next JS client for stream analysis tools (vectorscope, RGBA histogram, waveform)
• Develop or mantain Wix sites

FullStack Developer, Databases Manager

Xirect Software Solutions, Jul 2023 - Jul 2024

• Led the development of CRM and LMS systems, primarily using React, NestJS and MySQL.
• Adapted to various roles and teams, consistently delivering results.
• Supported multiple projects using JavaScript frameworks like React and Vue.

Web Developer

Universidad Adventista del Plata, Apr 2022 - Apr 2023

• Analyzed requirements, designed, and developed applications with Ruby on Rails.
• Built Student Portal functionality for self-managing certificates, reducing processing time and preventing fraud.
• Preparación de informes semanales.

Web Developer

Independently

• Built my portfolio with React and Supabase.
• Developed websites using React.
